PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience building multi-platform products and AI-powered systems used by 80K+ daily active users and 1M+ installs.

Focused on cross-platform architecture and system design, including unifying fragmented codebases into single, multi-tenant platforms and integrating RAG pipelines, NLP-driven analytics, and AI content generation systems into production.

Delivers end-to-end systems with emphasis on scalability, speed of execution, and maintainability.

TECHNICAL SKILLS

Languages :- Java, Kotlin, JavaScript, TypeScript, Swift, Go, PHP

Frontend & Mobile :- Android, React Native (Expo), Flutter, React.js

Backend & Architecture :- REST APIs, SQL, API Design, Multi-tenant Architecture, Cross-platform System Design

AI Systems :- LLMs (OpenAI, Vertex AI), RAG Pipelines, Prompt Engineering, NLP (Rasa), AI Content Generation Pipelines

Tools :- Firebase, Jenkins (CI/CD), GitHub, Bitbucket, Android Studio, VS Code

Core Areas :- System Design, Performance Optimization, Offline-first Systems, AOSP Integration

---

PROFESSIONAL EXPERIENCE

Mobcast Innovations Pvt Ltd

Senior Software Engineer → Full Stack Engineer
Jun 2024 – Present

- Built a unified cross-platform system (Android, iOS, Web) using React Native, replacing separate codebases and reducing feature development effort by ~3x
- Systems serve 80K+ daily active users and 1M+ installs across enterprise deployments

- Designed a multi-tenant architecture for centralized feature management and scalable client onboarding
- Implemented a RAG-based retrieval system using OpenAI and Vertex AI
- Built an NLP → SQL pipeline (Rasa) enabling natural language querying with structured and visual outputs
- Worked on an AI content generation system (courses, SCORMs, media), improving prompt consistency and output structure
- Increased engagement by 18% by integrating TTS + translation features across core modules
- Set up CI/CD pipelines using Jenkins for automated builds and releases
- Led development across a team of 5 engineers, owning architecture and cross-platform consistency

---

Aczet Pvt Ltd

Senior Android Developer
Apr 2023 – Jun 2024

- Developed Android applications integrated with custom AOSP-based devices
- Handled OS-level updates, hardware integration, and system-level debugging
- Built offline-first and performance-sensitive applications for enterprise use

---

Lahagora

Android Developer – OTT Applications
Jan 2023 – Apr 2023

- Developed Android TV OTT applications with optimized streaming performance
- Implemented UI and feature improvements for large-screen environments

---

Simple Inc.

Software Developer
Dec 2020 – Dec 2022

- Built Android and web applications across multiple client projects
- Delivered features end-to-end across the development lifecycle

---

PROJECTS

Unified LMS Platform

- Single codebase across Android, iOS, and Web
- Multi-tenant system with SSO and scalable architecture
- Integrated AI systems: RAG retrieval, NLP analytics, content generation

---

AI Smart Reporting

- Natural language → SQL → visualization pipeline
- Built using NLP (Rasa) and LLM integrations

AI Content Generation System (Beta)

- Generates courses, videos, and structured learning content
- Focus on prompt design and output consistency

EDUCATION

MCA (AI & Machine Learning) — Amity University (2023–2025)
BCA — KPB Hinduja College, Mumbai

CERTIFICATIONS

Google – Build Real-World AI Apps
Google – Prompt Design in Vertex AI
AWS APAC Solutions Architecture

ADDITIONAL

Languages: English, Hindi, Gujarati, Marathi
Interests: AI systems, rapid prototyping, investing, gaming
